Human Centered Design Capabilities

Revolve Solutions delivers transformative user-centric solutions using comprehensive Human Centered Design approaches, proven across client programs.

Strategic Communications

- Designed, developed, and delivered training to 3,000+ Army personnel
- Developed comprehensive learning paths for synchronous and asynchronous delivery
- Created role-based training matrices and personalized learning journeys
- Implemented ADDIE Methodology for systematic training development
- Proven track record of successful workforce transformation support

User-Centric Design & Implementation

- Expert facilitation of collaborative design sessions
- Development of intuitive user interfaces
- Creation of comprehensive user guides
- Integration of accessibility compatibility
- Multi-modal content delivery optimization

Digital Engineering Capabilities

We implement modern practices that engineer rapid development and enhance decision-making.

Enterprise Architecture Development

- DoDAF-compliant architecture development
- Business process improvement and optimization
- System interface design and integration
- Data architecture and analytics implementation
- Cloud migration planning and execution

Digital Transformation Support

- Legacy system modernization expertise through change management
- Cloud architecture planning/implementation
- Enterprise data services catalog development
- Risk management framework implementation
- IT portfolio management and optimization

Key Technologies & Methodologies

- ADDIE Instructional Systems Design Model
- DoD Architecture Framework (DoDAF)
- 508 Compliance and Accessibility (certification through the International Association of Accessibility Professionals (IAAPP))
- Data Governance and Management (DCAM certification through EDM council)
- Enterprise Resource Planning (SAP, Oracle)
- Cloud Migration & Architecture
- Risk Management Framework (RMF)
- Microsoft Azure DevOps
- Adobe Creative Suite
- SharePoint/Office 365

Proven DoD Experience

- Multiple successful large-scale Army implementations
- Senior level architecture for Navy IT Portfolio analysis
- DOD-wide hybrid training implementation for Sexual Assault Prevention and Response (SAPR)
- Deep understanding of military requirements and acquisition/procurement processes, including agile development
- Experience with classified and secure environments
- Track record of successful knowledge transfer to government personnel

Comprehensive Digital Transformation Expertise

- End-to-end solution development capability
- Proven change management methodologies
- Integration of training and technology implementation
- Focus on sustainable, long-term solutions

Technical Excellence

- Expertise with modern cloud technologies
- Expertise in enterprise architecture development
- Strong data analytics capabilities
- Proven instructional design methodologies
